

Participation

CIGRE membership comes with a wide and stimulating range of participation, problem-solving and skill growth opportunities. For example, you can:

- Build a parallel technical career by joining global colleagues in a working group, with the possibility of advancement into our expert technical committees.
- Participate in the NGN, the Next Generation Network for professionals under 35 – our future experts!
- Join CIGRE Women in Engineering. WiE is a forum for women engineers to interact, develop their careers, increase their self-confidence, improve their professional skills and accomplish their dreams.
- Subscribe and contribute to CIGRE publications, including ELECTRA and CIGRE Science and Engineering.
- Contribute to and attend global, regional and local events.

If you would like to get involved, talk to your National Committee contacts to find out more.
