 Scientific institutions

(Please tick as appropriate)

Contact details

* Required information

Company address:

Company* Division

Street* Postcode/Town* Country*

Internet address State

Contact person: Mr Ms/Miss/Mrs

Surname* First name* Title/academic degree

Position*

Phone Fax Email*

For network operators: the number of voting rights is determined based on the length of the power network (see reverse side):

We operate networks with the following overall circuit length:

Low voltage (< 6 kV) km, from which cable length km Medium voltage (≥ 6 kV and ≤ 60 kV) km, from which cable length km

High voltage (> 60 kV bis < 220 kV) km, from which cable length km Extra High voltage (≥ 220 kV) km, from which cable length km

In addition to our voting rights based on network length, we would like to acquire voting rights.

For all other companies or organisations:

We would like to acquire voting rights.

Declaration of consent for data protection:

- I agree that my personal data may be electronically processed by VDE. This data will only be used for purposes in accordance with the FNN Rules of Procedure. The data will only be passed on to processors within the scope of these purposes. Propagation to other third parties does not take place. If the membership ends your data will be disabled and then deleted within the statutory time limits.

Information about your stored data as well as restriction of the processing or data transmission is to be requested under datenschutz@vde.com.

Further information on data protection can be found at <https://www.vde.com/en/privacy-policy>.

- I agree that the name of my company or organisation may be published on the FNN website (www.vde.com/fnn) in the form of a list of members and on a map. This declaration of consent can be revoked at any time in the future without explicit reasons by sending an email to fnn@vde.com.

What is the Forum Network Technology / Network Operation?

We are the grid experts of the VDE. We design the further development of the power supply system and develop forward-looking concepts, solutions and requirements. As technical regulator, we ensure that the decisive course is laid at an early stage for the upcoming tasks of the energy transition, digitalization and e-mobility. The power grid of the future: a system with millions of players and interfaces. Despite different interests, the various stakeholders in FNN are working together to develop common solutions. FNN stands for the combined expertise of more than 450 manufacturers, grid operators, plant operators, aggregators and scientific institutions. Working together for the safe operation of the whole power system.

Who could become a member?

Companies, organisations and authorities with a particular interest in the promotion of network technology and network operation for the electricity supply can become members of the Supporters Circle in accordance with the FNN procedural rules.

How much does membership cost?

The membership fee is determined annually by the Supporters Circle and amounts to 1,150 euros per voting right (as of 01/2019). Each member has at least one voting right.

For grid operators, the number of voting rights depends on the weighted circuit length of their grid. The number of voting rights increase by one for each additional 2,500 km of weighted circuit length or part thereof.

The annual membership fee for companies other than network operators is based on acquired voting rights.

FNN membership fee is independent of other VDE membership fees or contributions.

Benefits for members

- FNN documents free of charge or with significant discount (does not apply to VDE application rules)
- Access to the member area with structured information on FNN topics
- Reduced participation fees in FNN events
- Regular editions of the FNN member information provide an overview of the current activities of the FNN, reports on the main topics and on the latest publications and events.
