

# Battery Trainings & Workshops

With the ever-changing battery industry, training is vital for your employees to stay up-to-date, increase their knowledge and improve their professional skills to work safely and effectively in the workplace.

VDE Renewables offers practice-oriented knowledge for customized seminars, courses and workshops at our facilities, in-house at the client as well as online trainings.

# Battery Trainings & Workshops

VDE Renewable's trainings are developed and conducted in close alignment with customers' needs and expectations. Our battery experts have a deep understanding of battery technology and years of training experience, providing first-hand knowledge that can be directly implemented.

Training can be tailored to all levels of experience of your employees – from beginners to experts.

Our seminars are modular in structure, so that the customer can put together the appropriate focus areas according to their needs and select the appropriate content for the corresponding target group.

We offer the following trainings, among others:

- **Lithium-Ion Battery Technology**  
(Market, construction, characteristics, life-time, safety, handling, storage, transport...)
- **Qualification for Work on High-Voltage Battery Systems**  
(Requirements, preventive measures, responsibilities, measuring procedures, practical exercises...)
- **Functional Safety of ESS**  
(Failure mode and effects analysis, safety life-cycle, hardware, software, EMC...)

We offer excellent training to the highest standards and customer satisfaction.

What our customers say about our trainings:

“VDE has conducted customized training on lithium-ion batteries, which has been extremely well received by Husqvarna's employees worldwide and has added great value to the company.” 

Qualify your employees to keep up your company innovative and competitive!
