

# AI QUALITY SUMMIT

Frankfurt, 02 Nov 2022

09:00 – 16:30

The first AI Quality Summit brings together the whole spectrum of experts and decision makers that are needed to achieve and prove quality of AI products.

Further information on:  
<http://ai-q.de/>

We want to discuss quality aspects including robustness, resilience, performance, auditability, transparency, and security. We want to take into account the regulatory context of the EU AI Act as well as frameworks from OECD, UNESCO, the Council of Europe and other multinational institutions, the business need for Europe to compete on quality in global markets, and the engineering context of fundamental scientific, technical, standardisation and operational aspects that make AI quality a tough challenge.

**House of Logistics and Mobility GmbH**  
Bessie-Coleman-Straße 7  
Gateway Gardens  
60549 Frankfurt am Main

Event organised by

# Programme
